

Task 4: Software Deployment Plan

1. Standard Software Packages:

Software	Purpose
Microsoft Office 365	Productivity tools
Google Chrome	Web browsing
Microsoft Teams	Communication and collaboration
Adobe Acrobat Reader	PDF viewing
Antivirus Software	Security protection
Visual Studio Code	Programming and development

2. Department-Specific Software:

Department	Software
IT Department	VMware Workstation, Wireshark
Finance Department	Sage Accounting
HR Department	Payroll Management System
Training Department	Moodle LMS
Development Labs	IntelliJ IDEA, NetBeans, Git

3. Update Procedures:

3.1 Operating System Updates

- Updates deployed weekly using centralized management tools.
- Critical security updates installed immediately.

3.2 Software Updates

- Standard software updated monthly.
- IT department tests updates before deployment.

3.3 Backup Before Updates

- Full backups performed before major upgrades.
- Restore points created on client computers.

4. Licensing Requirements

Software	License Type
Windows 11 Pro	Volume License
Microsoft Office 365	Subscription License
VMware Workstation	Commercial License
Adobe Acrobat Reader	Freeware
Visual Studio Code	Free/Open Source

Licensing Policy:

- Only legally licensed software may be installed.
- License records maintained by the IT department.
- Annual software license audits conducted.

Task 5: IP Addressing Plan

5. Network Addressing Structure:

Device Type	Subnet
Servers	192.168.10.0/24
User Devices	192.168.20.0/24
Printers	192.168.30.0/24
Wi-Fi Network	192.168.40.0/24
VoIP Phones	192.168.50.0/24
CCTV Cameras	192.168.60.0/24
Guest Wi-Fi	192.168.70.0/24

Network Management Policies

- DHCP used for user devices and Wi-Fi clients.

- Static IP addresses assigned to servers and printers.
- VLANs used to separate departments and improve security.
- Guest Wi-Fi isolated from the internal network.
