

Hardware Recommendation

Asset	Quantity	Suggested Specification	Business Justification
Desktop Computers	20	Intel Core i5, 16GB RAM, 512GB SSD	General office use
Laptops	5	Intel Core i7, 16GB RAM	Mobility for management
Router	1	Business-grade firewall router	Internet connectivity
Switch	1	24-port Gigabit managed switch	Internal networking
Wireless Access Points	2	Dual-band Wi-Fi 6	Office Wi-Fi
Network Printers	2	Laser printers	Shared printing
NAS Device	1	8TB RAID storage	Backups and file sharing
UPS	2	1500VA	Power protection
Firewall Appliance	1	Hardware firewall with VPN support	Advanced network security and remote access
Cat6 Ethernet Cabling	25–30	Cat6 structured cabling	Reliable high-speed wired connections
Shared Network Printers	2	Business-grade laser network printers with Wi-Fi and duplex printing	Shared printing for departments, reduced printing costs, and improved office productivity
Server Rack / Network Cabinet	1	Lockable 12U–24U rack cabinet	Secure storage for networking equipment and servers
Backup Server	1	Business-grade backup server	Centralized backup and disaster recovery
VoIP Phones	10–15	IP-based office phones	Internal and external business communication
Domain Controller Server	1	Windows Server or Linux Server	Centralized user authentication and access management

Developer Workstations	4-8	High-performance CPUs, 32GB RAM	Software development and testing
Conference Room Equipment	1 Set	Webcam, microphone, smart display	Video meetings and remote collaboration
